INNOVATIONS

SkiWelt Ellmau - Going - mind-bogglingly sustainable

The expansion of the photovoltaic system on all roofs of the valley station, the mountain station, and the hotel complex in the SkiWelt Ellmau will save around 50% of energy costs in the building facilities in the future. In addition, the snowmaking system, and the pumping stations of the Hartkaiser reservoir will be expanded from 80,000 m³ to approx. 140,000 m³ as well as those of the Tanzboden reservoir from 125,000 m³ to approx. 160,000 m³. Furthermore, the pumping efficiency at the Hartkaiser will be increased from the current 280 lt/s to 780 lt/s and the cooling efficiency to 70%. A snow-making time of currently eight days is thus reduced to four days of full snowmaking, ensuring more operational reliability and security for the tourist region. In addition, the field-pipe system will be expanded by approx. 5.50 km, which means, larger pipes, a reduction in the flow rate and a renewal of the snow guns to a total of approx. 50 pieces.

SkiWelt Scheffau – mind-bogglingly sustainable

The SkiWelt Scheffau is focusing on improving and expanding the snow systems this year by purchasing new, energy-optimised snow guns and by merging the Scheffau and Brixen lakes. Also, a new winch machine has been purchased.

SkiWelt Söll – mind-bogglingly luxurious

A completely new "witchcraft" for connoisseurs, birthday children or romantics is the luxurious "champagne cable car". You can experience enjoyable moments with friends or family in the modern Hexenwasser (*witches' water*) cable car - either in the afternoon at 2:00 p.m. or in the evening from 6:30 p.m. For children there is the free treasure hunt "Ravens Rally" across the SkiWelt Söll.
